EMBRYOLISSE:
More than 60 years of experience of pharmaceutical skincare products.

The story begins in 1950 with a dermatologist at a hospital in Paris specializing in skin pathologies who created the legendary Embryolisse Lait-Crème Concentré, sold by millions in the world.

Guided by the same philosophy of providing the skin with its essential requirements, and maintaining the same demands in terms of effectiveness and tolerance, Laboratoires Embryolisse developed a real dermo-cosmetic expertise over the years; they expanded a full range of care products meeting all the needs of the face and the body, leaving the skin healthy and beautiful.

Passed on from mothers to daughters, recommended by dermatologists, adopted by many devotees, and even beauty secrets of many make-up artists, these care products have in common a clear result on the skin, in safety.

Embryolisse is a sincere, authentic and effective skin care brand, for all women who wish to commit their skin to a recognized expert in the health and beauty industry.

Nazoura CASSAM-CHENAÏ
Managing Director of Embryolisse
Essential
Because skin that is well nourished and moisturised is smoother and plumper, Embryolisse formulations provide the essentials: all the nutrients and moisture the skin needs to be in full health, looking young and beautiful. Nothing unnecessary, so that the skin is not over-sensitised for no good purpose.

Effective
Rigorous selection of active ingredients with recognised virtues and a long tradition of medicinal or cosmetic use (shea butter, beeswax, aloe vera, soy), combined with cutting-edge dermatological active ingredients such as hyaluronic acid and collagen.

Natural
Embryolisse formulations make use primarily of active ingredients of plant origin, produced from flowers and fruits.

Highly tolerant
All Embryolisse products abide by a strict formulation charter which is the result of pharmaceutical practices. Produced under pharmaceutical supervision and tested by dermatologists, they incorporate the right active ingredients in the right quantities, and are suitable for use on even the most sensitive skin.
Face Skin Cares

Because healthy, balanced skin is the first sign of the beauty of a face, Embryolisse facial care products go straight to the heart of the matter, gently cleansing the skin, then gorging it with moisture and essential nutrients, and finally providing specific treatment for the signs of ageing. With their natural and/or dermatological active ingredients, incorporated into comfortable textures that are a joy for even the most delicate skin, they make the face smoother and plumper, bursting with health.
